## Dr Nabet's magical pen

---

**The Treatment: *Dr Nabet's anti-aging treatment***

---

If you've been thinking about trying out some anti-aging treatments but are a little nervous of needles, botox guru Dr Nabet has a nifty pen that makes the process way less hair-raising. The fillerpen injects smaller amounts of botox into the skin's surface and not only means a less intense procedure but more gentle results. What's particularly pleasing about Dr Nabet's treatment is that the treatment is so light there's a good chance no one will even know you've had it done.

The pen treatment lasts around 4 months and can be topped up quickly and discreetly in his South Kensington clinic.

The verdict? This treatment left me 48 hours later with the result I was looking for. A light, gentle plumping of the skin that lasted a solid 4 months. Dr Nabet is a lovely man who made me feel relaxed and confident.
